

PROJECT OVERVIEW

We are proud to present our latest project, a 115 meters Chemical Tanker, designed with meticulous attention to detail and functionality. This vessel is specifically engineered to carry petroleum products with a flashpoint below 60° and various chemicals, classified under IMO II standards.

INTERIOR FOCUS

Our presentation showcases the interior design of the 2nd engineer's room, which we have modeled using Rhino and rendered with V-Ray to highlight the sophisticated design and functionality tailored for the vessel's operational needs.

TECHNICAL SPECIFICATIONS

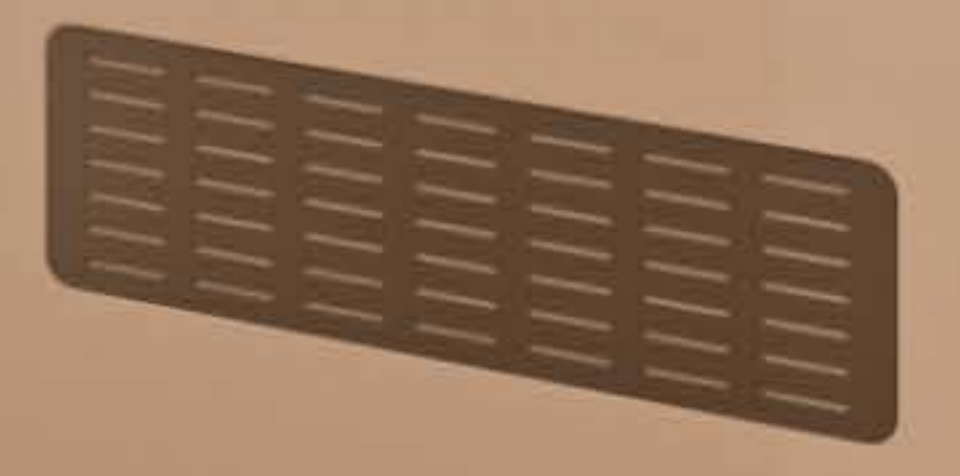

Vessel Length: 115 meters

Type: IMO II Chemical/Product Tanker

Cargo: Petroleum products and chemicals with flashpoints below 60°
