

PROJECT OVERVIEW

We proudly present: The 115 meters Oil/Chemical Tanker, meticulously designed for the safe and efficient transport of petroleum products with a flashpoint below 60°C and chemicals classified under IMO II standards. Every detail has been optimized for maximum efficiency, prioritizing functionality and safety.

INTERIOR DESIGN FOCUS

The Captain's Cabin and Crew Cabins have been specifically designed to enhance the quality of life for the crew. The fusion of modern aesthetics with engineering expertise ensures a perfect balance between the ergonomics and functionality of both spaces. The Captain's Cabin provides a dedicated space for the leader at the helm, while the Crew Cabins prioritize comfort and efficiency during long voyages.

TECHNICAL SPECIFICATIONS

Vessel Length: 115 meters

Type: IMO II Oil/Chemical Tanker

Cargo: Petroleum products and chemicals with a flashpoint below 60°C
