

## PROJECT OVERVIEW

We are proud to present our 104.20 meters Ro-Pax vessel. Designed for passenger, vehicle, and cargo transportation, this vessel has a carrying capacity of 400 tons of palletized cargo and up to 10 vehicles. Classified according to Bureau Veritas rules, the vessel meets the highest standards in safety, durability, and operational efficiency.

## INTERIOR FOCUS

Our presentation focuses on the interior design of the passenger lounges and crew living areas. These spaces have been designed with an emphasis on comfort and functionality, combining modern aesthetics with the operational needs of maritime environments. Rhino was used for modeling, while V-Ray was employed for rendering.

## TECHNICAL SPECIFICATIONS

- Vessel Length: 104.20 meters
  - Type: Ro-Pax Vessel
- Cargo Capacity: 400 tons including vehicles
- Propulsion System: 2x2995 kW Main Engines @900 rpm
  - Propellers: 2xFPP Ø3000 mm
  - Speed: 13.0 knots @ 85% MCR
